

## **Praxair Freezing & Snowing Systems Displayed at Process Expo**

DANBURY, Conn., (August 9, 2017) – Praxair, Inc. (NYSE: PX) announced today that its *ColdFront*™ ultra performance flighted freezer – designed to help customers produce individually quick frozen (IQF) products – will be on display at the FPSA Process Expo. By gently tumbling food pieces during freezing, Praxair’s flighted freezer prevents individual pieces from sticking together while providing maximum exposure to the cryogen for quick and thorough freezing. In addition, Praxair’s latest developments in carbon dioxide snow production for bulk bin and spot cooling will be featured.

Praxair is an FPSA allied member and works with food processing companies to provide effective and cost-efficient methods to utilize liquid nitrogen or liquid carbon dioxide to rapidly freeze or chill food products to the desired target temperatures. Process Expo will be held in Chicago’s McCormick Place North Hall, September 19-22, 2017. Praxair will be on hand in booth 2067 to discuss how cryogenic gas technology has helped customers lower their production costs and improve overall product quality.

“The Process Expo show floor offers visitors a look at many of the latest advances in food processing and production,” said Chris Johnson, Praxair business development director. “Praxair’s food cooling and freezing systems are designed for rapid and efficient heat removal to help processors benefit from high quality individually quick frozen products produced within a small footprint.”

During the show hours, Praxair’s guest chef will conduct live demonstrations using nitrogen and carbon dioxide (dry ice) with customized menu formations

replicating fast heat removal scenarios throughout the production line. Product samples will be served at the end of each demonstration.

### **About Praxair**

Praxair, Inc., a Fortune 300 company with 2016 sales of \$11 billion, is the largest industrial gases company in North and South America and one of the largest [worldwide](#). The company produces, sells and distributes atmospheric, process and specialty [gases](#), and high-performance surface coatings. Praxair products, [services](#) and technologies are making our planet more productive by bringing efficiency and environmental benefits to a wide variety of industries, including [aerospace](#), [chemicals](#), [food and beverage](#), [electronics](#), [energy](#), [healthcare](#), manufacturing, primary metals and many others. More information about Praxair, Inc. and the gas stripping system to remove dissolved oxygen is available at [www.praxair.com](http://www.praxair.com).

### **About FPSA**

The Food Processing Suppliers Association (FPSA) is a global trade association serving suppliers in the food and beverage industries. The Association's programs and services support member's success by providing assistance in marketing their products and services, overall improvement in key business practices and many opportunities to network among industry colleagues. Programs and services to achieve these objectives include PROCESS EXPO (industry leading trade show), electronic media marketing, education, market intelligence, research of, and advocating for critical industry issues such as food safety, sanitary design of equipment, and global trade.
