...any time of day, with cryogenic technology from Praxair. Everyone knows that food products will begin to freeze at different rates as the temperature drops, but not everyone knows how important it is to control product temperature fluctuations for best results. Praxair knows how to target the optimal temperature to freeze your product. Avoid the time-consuming, labor intensive freeze/thaw cycle of mechanical freezing with Praxair freezing and chilling technologies. **Let Praxair help you control your world. Give us a call at 1-800-PRAXAIR.**
